Price:$205.00

Availability

Payment by credit card can be made after agreeing to the NAT license agreement at checkout. Your order will be shipped within ten (10) days of payment confirmed by your credit card. Please allow 5-7 days for delivery.

What is NAT?

The NAT consists of two forms: (I) a Long Version, and (II) a Short Version. Both examine non-verbal production of canonical and noncanonical sentences. The Long Version examines production of the same sentence types examined with the Northwestern Assessment of Verbs and Sentences (NAVS) (Thompson, 2011; http://www.flintbox.com/public/project/9299/), including active sentences, passive sentences, subject extracted wh-questions, object extracted wh-questions, subject relatives, and object relatives. The Short Version examines production of a subset of these structures: subject extracted wh-questions and object extracted wh-questions.
