

# Animal sterile surgical isolator with drainage system

Published date: June 1, 2017

## Technology description

The present invention relates to an animal isolator for use in childbirth in an aseptic state. The animal sterile surgical isolator of the present invention improves the drain port of the conventional surgical isolator. Liquid waste, such as sewage and waste water, is produced during childbirth operations on sows, etc. The drain not only drains the waste water, but also prevents the outside air from entering the isolator, ensuring that the operation is carried out in a sterile state.

## Application area

Aseptic operation on animal

## Institution

[Kangwon National University](#)
