

Simple, Accurate, Real-Time 3D Imaging System

Published date: Feb. 1, 2012

Technology description

Summary

This invention relates to a simple, inexpensive, automated 3-D imaging system that will allow a physician to perform a rapid preoperative and postoperative 3-D analysis of the head and neck. The technology aids in airway quality evaluation in anesthesiology; plastic surgery and biometric systems, including 3-D facial recognition.
