

Slide guide catheter for acute ischemic stroke repair

Published date: May 1, 2020

Technology description

Slide guide catheter for acute ischemic stroke repair.

Value Proposition:

- *Less complexity in setup for acute ischemic stroke mechanical thrombectomy.

- *Ability to lock the suction catheter in place relative to the guide catheter.

Market Opportunity:

- *Acute ischemic stroke is a growing opportunity.

- *This product allows for differentiation for device companies looking to capture more of the untapped stroke market.

- *Fewer devices on the catheterization lab table may make this procedure seem more approachable.
