### Technology description

**Drug Free Therapeutix, LLC provides intelligent software for medical device companies in or entering the pain management device market.**

### Drug Free Therapeutix, LLC

### About

Drug Free Therapeutix, LLC (DFTx) is a Purdue University startup that provides intelligent hardware and software for medical device companies in or entering the pain management device market. Their technology platform, Extraneural Activation Control Technology (EXACT™), fine-tunes the output of an implanted or external stimulator according to the measured physiological response of a patient to electrical stimulation. By partnering with key pain management device companies, they will offer personalized pain management solutions to chronic pain sufferers who do not receive adequate results with available pharmaceutical or device-based treatment options.

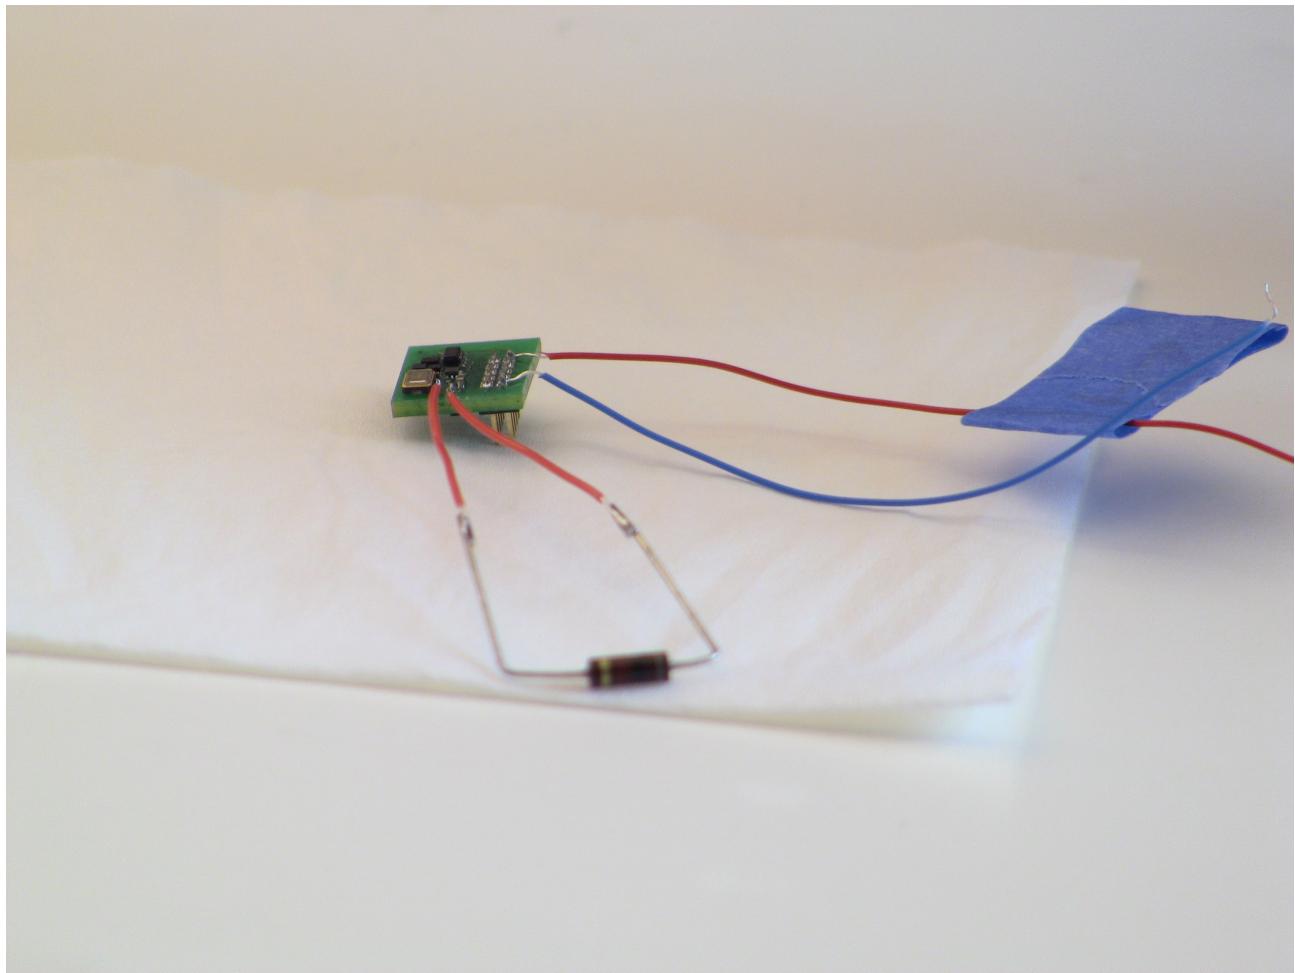

## Executive Team

Dr. John Ward, Founder and Chief Executive Officer

Dr. Matthew Ward, Chief Science Officer; Research Scientist in the Center for Implantable Devices, Purdue University

Dr. Pedro Irazoqui, Chief Innovation Officer; Associate Professor of Biomedical and Electrical Engineering, Purdue University
